### **DETAILED ACTION**

1. The amendment filed on 24 October 2006 have been received and entered. Claims 1-3, 5-19 and 21-32 are pending in the application.

#### ***Allowable Subject Matter***

2. Claims 1-3, 5-19 and 21-32 are allowed.
3. The following is an examiner's statement of reasons for allowance: The present invention teaches a method of presenting self-modifying web pages that has the ability to automatically remove a hyperlink and associated content after the hyperlink has been selected. Each of the independent claims identifies the distinct feature of "redisplaying the first web page, wherein content associated with the selected anchor is elided, wherein the content comprises the selected anchor". The closest prior art, Logan et al. U.S. Patent 5,761,683, teaches displaying selectable anchors on a web page and rewriting the incoming web page by eliding (suppressing/deleting) content *before* the web page is displayed. However, the prior art fails to teach that the web page displaying the user-selected anchor is *redisplayed* with the user selected anchor (URL/link) elided. Thus, the prior art fails to anticipate or render the above limitations obvious.
4. Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
